Art Unit: 1714

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-38 are rejected under 35 U.S.C. 102(b) as being anticipated by WO '173 as evidenced by the US equivalent to Boege et al.

Boege et al disclose polymeric dispersions suitable for coating compositions comprising polymer mixed with fatty compounds in relative amounts such as claimed instantly. These fatty compounds are taught as derived from mono and polyunsaturated acids and saturated and unsaturated alcohols and glycols as well as derivatives of soy bean oil and are seen as meeting the various limitations of the instant claims (see columns 3-4). One or more of these compounds may be used. Various commonly used adjuvants are taught at column 6, lines 1-7.

Therefore the reference anticipates the rejected claims.
